

CAYTON KENNETH ARCEO

Machinist & Graphics Artist

About Me: I am a skilled and flexible professional with experience in both machining and graphic artist. I have over 6 years of hands-on working experience as a CNC and conventional machinist, working in the Philippines and Japan. I also began learning graphic design on my own in 2019 and later worked professionally from 2022 to early 2025. I create mockups, vector designs, print-ready files, apparel, and packaging designs using Adobe Photoshop, Illustrator, and InDesign. I combine technical precision with creativity to produce high-quality work in both manufacturing and design.
